Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

5. Project Development Phase

Introduction

The development phase involves building the actual automated laptop procurement solution in ServiceNow.

Content

Step 1: Create Catalog Item

Create a **Standard Laptop Request** catalog item with fields such as Requested for, Laptop model, Business justification, Required date, and Additional requirements.

Step 2: Configure Flow Designer

Create a new flow in Flow Designer. **Trigger:** When a laptop request is submitted.

Step 3: Add Flow Actions

Get request information; check request conditions; request approval; create fulfillment task; update request status; send notification.

Step 4: Configure Assignment

Assign the generated task to the appropriate IT or procurement team.

Conclusion

The development phase transforms the project requirements and design into a working ServiceNow solution. The catalog item, Flow Designer automation, approvals, tasks, and notifications work together to streamline the laptop procurement process.
